Part 10: Emergency Management Manual Victoria

Introduction

This Part of the Manual contains information on telephone contacts, postal addresses and website addresses for key personnel of Victoria's emergency management agencies.

The directory concentrates on State-level contacts; production of regional and municipal emergency management telephone directories is a local responsibility.

Please forward amendments to information contained in this Contact Directory:

by mail to:

Other Support Agencies

The Victorian community receives significant benefit from the emergency management contributions of a wide range of volunteer groups and organisations whose operations are either quite specialised and/or available mainly in a specific locality.

These groups should be identified in relevant municipal emergency management plans and/or divisional response plans or regional recovery plans, as appropriate.

The organisations listed in this Manual are those with either broad or statewide presence, Government organisations, those with a statutory emergency management involvement and some private corporations with specific roles.
